

DVB Fundamentals Online

Master DVB Fundamentals
at your own pace & in your own place
@ only **US\$520!**

The **Digital Video Broadcasting Fundamentals course** is derived from the face-to-face course currently run by **DigiWorkz Asia-Pac Broadcast Training Centre, Singapore.**

This course covers:

- the DVB® standards and components of DVB® transmission systems
- analogue video signals, characteristics, and video line structure
- the analogue colour television system
- digital video sampling formats
- SDI embedded audio
- MPEG compression and I-, P-, and B-frames
- programme and transport streams
- modulation schemes used by DVB® standards

This Digital Video Broadcasting Fundamentals course combines interactions, animations, quizzes, audio, and an animated avatar guide to bring the course to life. On successful completion of the course, you will receive a Certificate of Competency in Digital Video Broadcasting Fundamentals.
